

Decision Analyst Global Economic Indices

April 2015

Arlington, Texas—The following table compares Decision Analyst's U.S. Economic Index to its Economic Indices for other countries. In South America, Brazil's Economic Index has declined 20 points in the past year, while Argentina increased 9 points. In Europe, the Economic Index is trending up in most of the major countries, signaling economic expansion in Europe for the remainder of the year. Russia's Economic Index, however, is down 7 points over the past year. The Economic Index for each country tends to lead economic activity in each country by 6 to 12 months.

Decision Analyst Global Economic Indices April 2015		
	April 2015 Index	Past-12-Month Change (From April 2014 to April 2015)

**Past-12-Month
Change**
(From April 2014 to
April 2015)

*Three-Month Moving Average

The Index numbers for Argentina, Australia, Brazil, Chile, Colombia, India, Mexico, Peru, the Russian Federation, and Spain are 3-month moving averages to smooth out month-to-month fluctuations. The reported Index number averages the current month with the 2 previous months. Prior to March 2014, the Index numbers reported for Germany were a 3-month moving average. Starting in March 2014, the Index numbers reported for Germany are the actual monthly numbers.

Methodology

The Decision Analyst Economic Index is based on a monthly online survey of several thousand households balanced by gender, age, and geography. The scientific survey is conducted in the last 10 days of each month. The Economic Index is calculated from 9 different economic measurements using a sophisticated econometric model. The result is a snapshot of coming economic activity in each country surveyed, as seen through the eyes of representative consumers living in the respective countries.

Decision Analyst conducts its concurrent economic surveys each month in Argentina, Australia, Brazil, Canada, Chile, Colombia, France, Germany, India, Italy, Mexico, Peru, the Russian Federation, Spain, United Kingdom, and the United States. Whenever the Decision Analyst Economic Index is greater than 110, it tends to signal an expanding economy. An Index value of 90 to 110 suggests a no-growth or slow-growth economy, and near or below 90 generally indicates economic contraction. These guidelines vary by country, however.

About Decision Analyst
