

# Decision Analyst Global Economic Indices

November 2018

Arlington, Texas—The following chart compares the U.S. Economic Index to Decision Analyst's Economic Indices for other countries. The Economic Indices for all European and South American countries are lower than the U.S. Economic Index, and many countries are seeing declines in their Indices. In Europe, France has declined 9 points in the past 12 months, while Italy has increased 2 points. In South America, Argentina has declined 17 points in the past 12 months, while Peru has declined 7 points. The major countries tracked by Decision Analyst are shown below.

Global Economic Indices November 2018		
	Nov. 2018 Index	Past-12-Month Change (From Nov. 2017 to Nov. 2018)
<b>North America</b>		
 United States	117	↑ +1
 Canada	98	↑ +3
 Mexico*	104	↑ +6
<b>South America</b>		
 Argentina*	75	↓ -17
 Brazil*	102	↓ -1
 Chile*	97	↓ -6
 Colombia*	100	↑ +4
 Peru*	101	↓ -7
<b>Europe</b>		
 France	84	↓ -9
 Germany	105	↓ -1
 Italy	99	↑ +2
 Russian Federation*	100	↓ -2
 Spain*	99	→ +/-0
<b>Asia</b>		
 India*	130	↑ +10

\* The Index numbers for Argentina, Brazil, Chile, Colombia, India, Mexico, Peru, the Russian Federation, and Spain are 3-month moving averages to smooth out month-to-month fluctuations. The reported Index number is an average of the current month with the previous 2 months.

The Decision Analyst Economic Indices are based on monthly online surveys in the respective countries; these surveys provide inputs to Decision Analyst’s econometric models that compute the Economic Indices for the different countries.

**Asia**

**India\* Economic Index  
November 2018**

**Past-12-Month  
Change**  
(From Nov. 2017 to  
Nov. 2018)

## \*Three-Month Moving Average

The Index numbers for Argentina, Brazil, Chile, Colombia, India, Mexico, Peru, the Russian Federation, and Spain are 3-month moving averages to smooth out month-to-month fluctuations. The reported Index number averages the current month with the 2 previous months. Prior to July 2013, the Index numbers reported for Germany were a 3-month moving average. Starting in July 2013, the Index numbers reported for Germany are the actual monthly numbers.

## Methodology

The Decision Analyst Economic Index is based on a monthly online survey of several thousand households balanced by gender, age, and geography. The scientific survey is conducted in the last 10 days of each month. The Economic Index is calculated from 9 different economic measurements using a sophisticated econometric model. The result is a snapshot of coming economic activity in each country surveyed, as seen through the eyes of representative consumers living in the respective countries.

Decision Analyst conducts its concurrent economic surveys each month in Argentina, Brazil, Canada, Chile, Colombia, France, Germany, India, Italy, Mexico, Peru, the Russian Federation, Spain, and the United States. Whenever the Decision Analyst Economic Index is greater than 110, it tends to signal an expanding economy. An Index value of 90 to 110 suggests a no-growth or slow-growth economy, and near or below 90 generally indicates economic contraction. These guidelines vary by country, however.

## About Decision Analyst
